

HR Analytics Report

Attrition & Salary Insights — Workforce Review
Prepared by: Data Analytics Team | For: HR Team, People Operations | Date: 26 September 2026

Executive Summary

This report addresses the HR team's request for workforce review insights, covering two areas: attrition patterns across departments, and salary distribution across departments. A Power BI dashboard (2 pages) was built to deliver both analyses interactively, with supporting slicers for drill-down by department and position. This document summarizes the original request and maps it against what the dashboard delivers.

1. Request Overview

The People Operations team requested an analysis of the current employee dataset, as outlined below:

#	Area	Requirement
1	Attrition Overview	Identify the department with the highest number of resignations/terminations (Termd = 1) and summarize the trend.
2	Salary Distribution	Compare average salary across departments and flag notable differences.

Note: A third area (Performance vs. Satisfaction) was part of the initial draft request and was subsequently removed from scope.

2. Dashboard Overview

The Power BI dashboard consists of two report pages, each directly aligned to one requirement area.

Page 1 — Attrition Overview

- Department slicer for interactive filtering
- Column chart: employee terminations count by Department, split by termination type
- Funnel chart: headcount by Citizenship status
- Pie chart: terminations by Gender
- Bar chart: inactive employees by Manager

Page 2 — Salary Distribution

- Department and Position slicers for interactive filtering
- Clustered bar chart: total salary by Department
- Bar chart: average salary by Position
- Donut chart: average salary by Citizenship status
- Pie chart: average salary by recruitment source (Diversity Job Fair)

3. Coverage Mapping

Requirement	Dashboard Coverage	Status
Attrition Overview	Page 1 — terminations by department, gender, manager, and citizenship, with department-level drill-down.	Covered
Salary Distribution	Page 2 — average and total salary by department, with further cuts by position, citizenship, and recruitment source.	Covered

4. Recommended Next Steps

- Review Page 1 with HR to confirm the department(s) with highest attrition and validate root causes.
- Review Page 2 to flag any department where average salary appears misaligned with market or role expectations.
- Share the interactive dashboard link/file with stakeholders for self-serve drill-down by department and position.
